- 9. Research Interest:** Neuroinflammation, Cell Death, Transcription Factors, Neurodegenerative disorders.
- 10. Research Summary:** My research aim is to develop a drug which can halt the disease progression of Parkinson's in PD patients. Current treatment of PD doesn't targets the underlying cause of death of dopaminergic neurons. I'm trying to develop a therapy to prevent further loss of nigrostriatal neurons by targeting transcription factors which promote neuroinflammation and subsequent death of dopaminergic neurons.
