FACULTY OF ENGINEERING & TECHNOLOGY

BCS-503: Object Oriented Techniques

Lecture-28

Preeti Singh

Computer Science & Engineering

OBJECTIVES

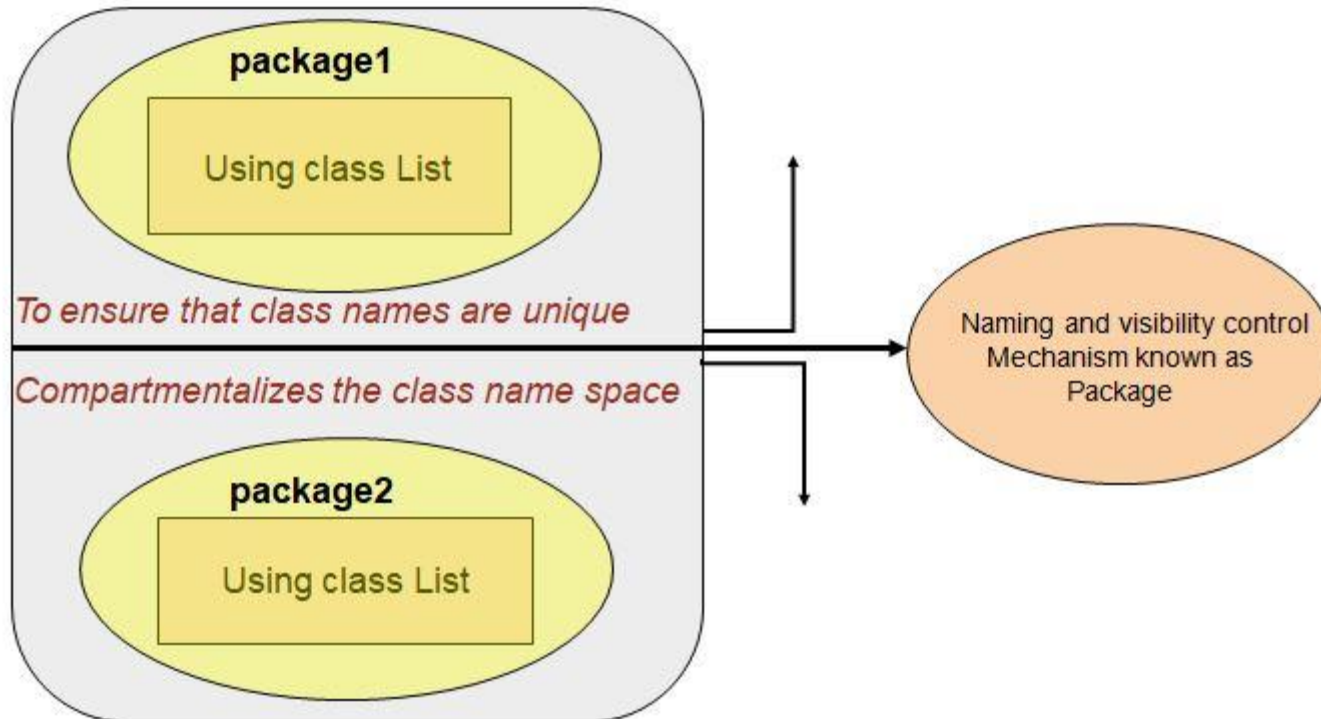

In this PPT, you will learn to:

- ❖ Define packages
- ❖ Creating Packages in Java
- ❖ Packages and Access control

Packages

Program Code

CREATING PACKAGES IN JAVA

Syntax

```
package <packagename>;
```

<packagename> is the valid identifier following package naming conventions

```
...
package pack;
public class Welcome {
    public void greet() {
        System.out.println("hello");
    }
}
...
```

CREATING PACKAGES IN JAVA (Contd.)

Syntax

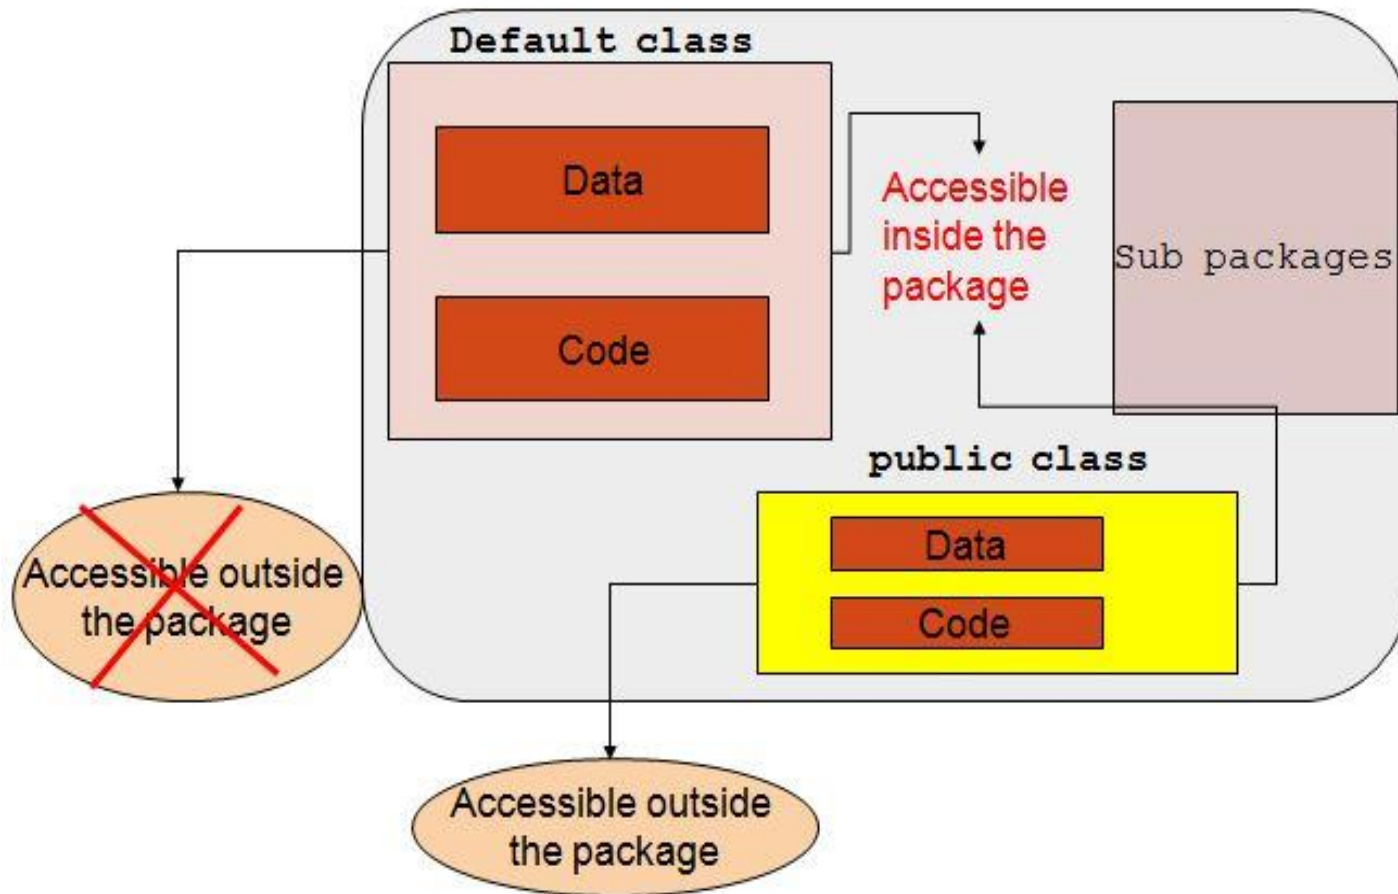

```
import <package-name>.*;  
import <package-name>.<class-name>;
```

It is possible to include the same package statement in more than one Java source file to indicate that all such classes belong to the same package.

```
import pack.Welcome;  
class Importer {  
    public static void main(final String [] args) {  
        Welcome.greet();  
    }  
}
```

PACKAGES AND ACCESS CONTROL

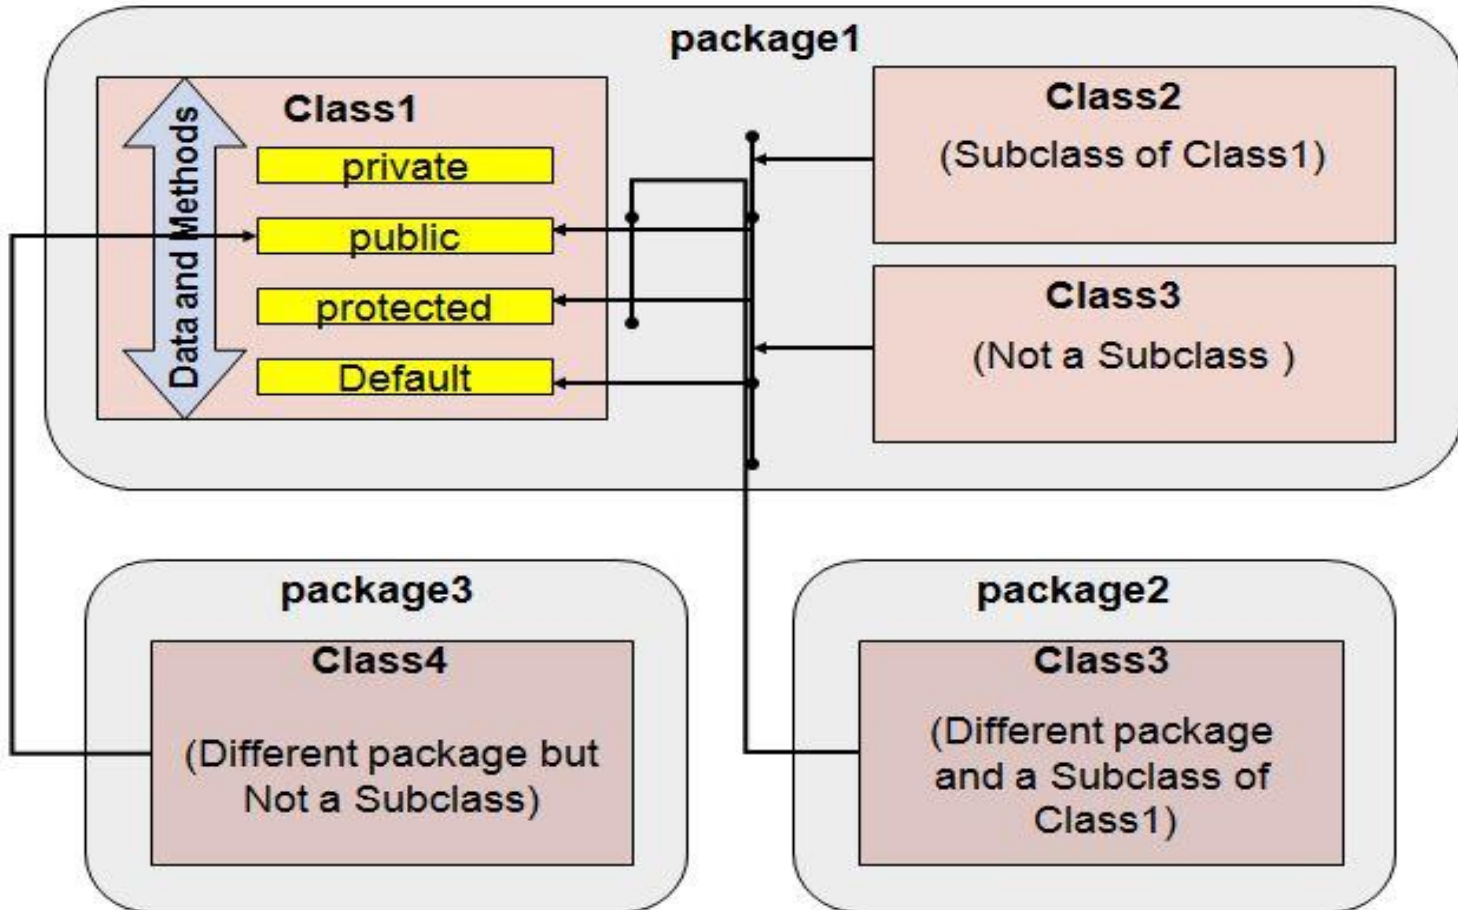

Package (container for classes and sub packages)

PACKAGES AND ACCESS CONTROL (Contd.)

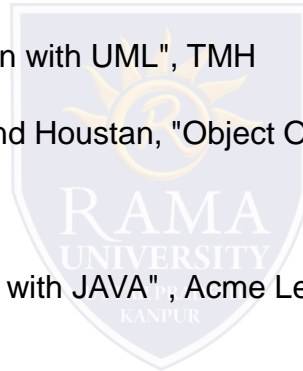

Location	private	No modifier	protected	public
Same class	Yes	Yes	Yes	Yes
Same package and also a subclass	No	Yes	Yes	Yes
Same package but not a subclass	No	Yes	Yes	Yes
Different package but a subclass	No	No	Yes	Yes
Different package but not a subclass	No	No	No	Yes

PACKAGES AND ACCESS CONTROL (Contd.)

MULTIPLE CHOICE QUESTION

Multiple Choice Question:

Q1. Which of these keywords is used to define packages in Java?

- a) pkg
- b) Pkg
- c) package
- d) Package

MULTIPLE CHOICE QUESTION

Multiple Choice Question:

Q2. Which of these is a mechanism for naming and visibility control of a class and its content?

- a) Object
- b) Packages
- c) Interfaces
- d) None of the Mentioned.

MULTIPLE CHOICE QUESTION

Multiple Choice Question:

Q3. Which of this access specifies can be used for a class so that its members can be accessed by a different class in the same package?

- a) Public
- b) Protected
- c) No Modifier
- d) All of the mentioned

MULTIPLE CHOICE QUESTION

Multiple Choice Question:

Q4. Which of these access specifiers can be used for a class so that its members can be accessed by a different class in the different package?

- a) Public
- b) Protected
- c) Private
- d) No Modifier

MULTIPLE CHOICE QUESTION

Multiple Choice Question:

Q5. Which of the following is the correct way of importing an entire package 'pkg'?

- a) import pkg.
- b) Import pkg.
- c) import pkg.*
- d) Import pkg.*

In this PPT, you learned that:

- The classes in a package must be saved under a folder that bears the same name as the package.
- The java.lang package is imported by default into every Java program.
