New routing table for J

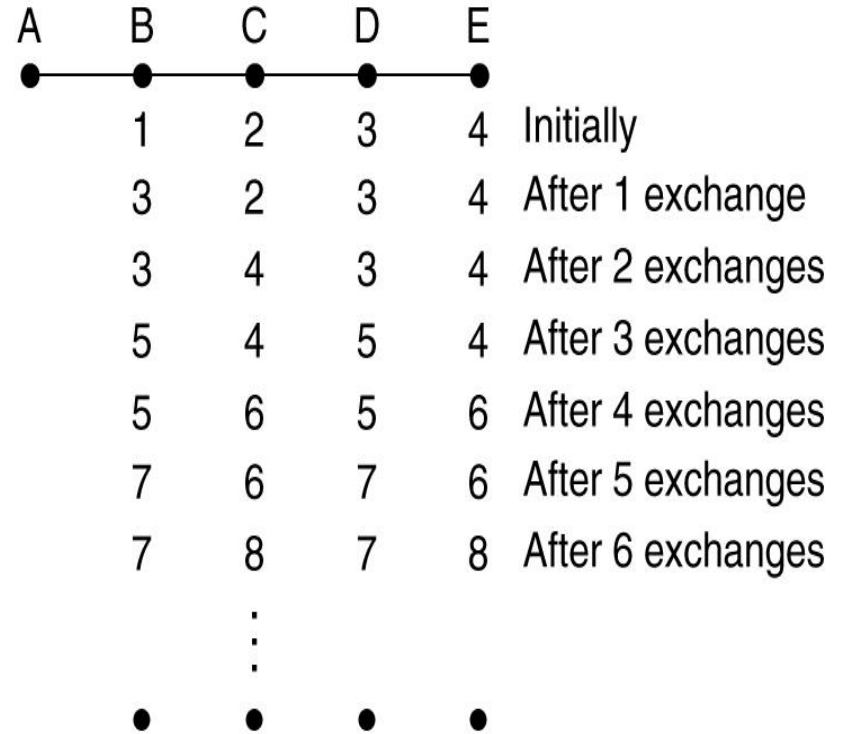

(b)

(b) Input from A, I, H, K, and the new routing table for J.

THE COUNT-TO-INFINITY PROBLEM

(a)

(b)

3 Distance Vector Routing (3): Loop-Breaking Heuristics

- Set infinity to a limited number, e.g. 16.
- Split horizon

Multiple Choice Question

MUTIPLE CHOICE QUESTIONS:

Sr no	Question	Option A	Option B	OptionC	OptionD
1	What is inter frame gap?	idle time between frames	idle time between frame bits	idle time between packets	idle time between networks
2	. An ethernet frame that is less than the IEEE 802.3 minimum length of 64 octets is called _____	short frame	runt frame	mini frame	man frame
3	What is the access point (AP) in a wireless LAN?	device that allows wireless devices to connect to a wired network	wireless devices itself	both device that allows wireless devices to connect to a wired network and wireless devices itself	all the nodes in the network
4	In wireless ad-hoc network _____	access point is not required	access point is must	nodes are not required	all nodes are access points
5	Which multiple access technique is used by IEEE 802.11 standard for wireless LAN?	CDMA	CSMA/CA	ALOHA	CSMA/CD
