# **HYPERPARATHYROIDISM**

**DEFINITION:** In this type of disorder increase production of parathyroid hormone and lead to increase level of calcium into blood

# CAUSES

- Idiopathic
- Genetic problem
- Carcinoma of parathyroid
- Adenoma
- Increase calcium diet

# SIGN AND SYMPTOMS

- Polyurea
- Seizures
- Increase chances of renal stone
- Disarrythmia
- Osteoporosis
- Thining of bone

# DIAGNOSIS

- Assess PTH level
- Calcium level
- Phosphate level
- Urine examination
- U.S.G
- M.R.I
- C.T. Scan

# MANAGEMENT

- Drug of choice: Calcimar
- Antidiuretic
- Provide phosphate

- **Nursing management**

- Provide I.V. Fluid to maintain hydration
- Assess vital sign
- Maintain I/O chart
- Urine assessment
