ENT -321 Management of Beneficial Insects 2 (1+1)

Lecture-6 Pollination:

Mainly pollination is of two types: Abiotic and Biotic.

Abiotic: mainly in two ways. Wind pollination, known as anemophily and Water pollination, known as hydrophily (2%).

Biotic Pollination (zoophily):

1. **Bee Pollination (Melittophily):**

2. **Butterfly Pollination (Psychophily)**

3. **Moth Pollination (Phalaenophily)**

4. **Fly Pollination (Myophily and Sapromyophily)**

5. **Beetle Pollination (Cantharophily)**

6. **Bird Pollination (Ornithophily)**

7. **Bat Pollination (Chiropterophily)**

8. **Pollination by Non-Flying mammals (Therophily)**
