

## FACULTY OF COMMERCE AND MANAGEMENT

COURSE: B.COM V SEM.
SUBJECT: INTRODUCTION TO FINANCIAL MANAGEMIENT

SUBJECT CODE: BCH 505
LECTURE: 17
NAME OF FACULTY: DR. PALASH BAIRAGI

## LECTURE-17

## b) Computation of Profitability Index

Present value of cash inflow
Present value of cash outflow
Profitability index
$\frac{5,18,400}{4,00,000}$
1.3
$\frac{5,23,200}{4,00,000}$
1.31

Since net present value and profitability index of Machine B is higher. Machine B is therefore recommended.

Illustration9.One of the two machines A and B is to be purchased. Form the following information find out which of the two will be more profitable? The average rate of tax may be taken at $50 \%$.

|  | Machine A (Rs.) | Machine B (Rs.) |
| :--- | :--- | :--- |
| Cost of machine | 50000 | 80000 |
| Machine Life | 4 years | 6 years |
| Earnings Before Tax |  |  |
| 1st year | 10000 | 8000 |
| 2nd year | 15000 | 14000 |
| 3rd year | 20000 | 25000 |
| 4th year | 15000 | 30000 |
| 5th year |  | 18000 |
| 6th year |  | 13000 |

## Solution:

## Machine A

| year | EBT | Tax@ 50\% | EAT | Cash flows | Cumulative <br> cash flows |
| :--- | :--- | :--- | :--- | :--- | :--- |
| $\mathbf{1}$ | 10000 | 5000 | 5000 | 17500 | 17500 |
| $\mathbf{2}$ | 15000 | 7500 | 7500 | 20000 | 37500 |
| $\mathbf{3}$ | 20000 | 10000 | 10000 | 22500 | 60000 |
| $\mathbf{4}$ | 15000 | 7500 | 7500 | 20000 | 80000 |

Pay back period:
Investment $=50000$
Recovery up to 2nd year is 37,500
Balance 12500 in 3rd year $=12500 / 22500=0.55$ years i.e. 2.55 years
Average rate of returns:
(on original investment basis)
Average earnings/net investment x 100
$30000 \times 4 / 50000 \times 100=15 \%$

Machine B

| year | EBT | Tax@ 50\% | EAT | Cash flows | Cumulative <br> cash flows |
| :--- | :--- | :--- | :--- | :--- | :--- |
| $\mathbf{1}$ | 8000 | 4000 | 4000 | 17333 | 17333 |
| $\mathbf{2}$ | 14000 | 7000 | 7000 | 20333 | 37666 |
| $\mathbf{3}$ | 25000 | 12500 | 12500 | 25833 | 63499 |
| $\mathbf{4}$ | 30000 | 15000 | 15000 | 28333 | 91832 |
| $\mathbf{5}$ | 18000 | 9000 | 9000 | 22333 | 141165 |
| $\mathbf{6}$ | 13000 | 6500 | 6500 | 19833 | 133498 |

Pay back period
Investment = Rs. 80,000
Cumulative Cash Flows shows that the recovery up to 3 rd year $=63499$
therefore for the balance of Rs. 16501 will be recovered in 4th year. i.e.
$16501 / 28333=0.58$ year
therefore payback period is 3.58 years
Average rate of return (based on original investment)
Average Profits/net investment x 100
54000/6 x 100
$11.25 \%$
Machine A is profitable in both the cases
Note: - It has been assumed that Earnings Before tax in the problem is after considering depreciation on straight line basis.

Illustration 10. No Project is acceptable unless the yield is $10 \%$. Cash inflows of a certain project along with cash outflows are given below:

| Year | Outflow (Rs.) | Inflow(Rs.) |
| :--- | :--- | :--- |
| 0 | 150000 | - |
| 1 | 30000 | 20000 |
| 2 | - | 30000 |
| 3 | - | 60000 |
| 4 | - | 80000 |
| 5 | - | 70000 |

Calculate net present value
Solution:
Calculation of Net Present Value

| Year | PVIF | Outflows |  | Inflows |  |
| :--- | :--- | :--- | :--- | :--- | :--- |
|  |  | Amount (rs.) | Present <br> Value (Rs.) | Amount <br> (Rs.) | Present <br> Value(Rs.) |
| 0 | 1.000 | 150000 | 150000 |  |  |
| 1 | 0.909 | 30000 | 27270 | 20000 | 18180 |
| 2 | 0.826 |  |  | 30000 | 24780 |
| 3 | 0.751 |  |  | 60000 | 45060 |
| 4 | 0.683 |  |  | 80000 | 54640 |

| 5 | 0.621 |  |  | 70000 | 43470 |
| :--- | :--- | :--- | :--- | :--- | :--- |
|  |  |  | $\underline{\underline{177270}}$ |  | $\underline{\underline{186130}}$ |

Net present value $=$ Present value of Inflows - Present value of Inflows

$$
\begin{aligned}
& \text { Rs. } 186130 \text { - Rs. } \\
& 177270=\text { Rs } 8860
\end{aligned}
$$

Problem1: 1 A Company whose cost of capital is $12 \%$ is considering two Machines A and B. The following data are available:-

|  | Machine A (Rs.) | Machine B (Rs.) |
| :--- | ---: | ---: |
| Cost of machine | $1,40,000$ | $1,40,000$ |
| Cash inflows |  |  |
| 1st year | 20,000 | $1,00,000$ |
| 2nd year | 40,000 | 80,000 |
| 3rd year | 60,000 | 40,000 |
| 4th year | $1,00,000$ | 20,000 |
| 5th year | $1,10,000$ | 20,000 |
|  | $3,30,000$ | $2,60,000$ |

Recommended in which machine company should invest by using the following methods
a. Pay back method
b. Net present value
c. Profitability index

Problem2: X ltd is considering the purchase of a new machine. Two alternatives are available having a cost price Rs. 200000 each. The following inflows are expected during the five years life of both the machines are 5 years.

| Year | Machine A | Machine B |
| :--- | :--- | :--- |
| 1 | 15,000 | 5,000 |
| 2 | 20,000 | 15,000 |
| 3 | 25,000 | 20,000 |
| 4 | 15,000 | 30,000 |
| 5 | 10,000 | 20,000 |
|  |  |  |

The company is expecting $10 \%$ returns on its capital.
The net present value of Rs. 1 @ $10 \%$ are given as follows

| 1st year | 0.909 |
| :--- | :---: |
| 2nd year | 0.826 |
| 3rd year | 0.751 |
| 4th year | 0.683 |
| 5th year | 0.620 |

You are required to appraise the proposals on the basis of

1. Pay back period method

Average rate of return method
Net present value method
Problem 4. Consider the following proposal investment with the indicated cash inflows

| Investment | Initial outlay | Year end cash Inflows |  |  |
| :--- | :--- | :--- | :--- | :--- |
|  |  | Year1 | Year2 | Year3 |
| A | 200 | 200 | Nil | Nil |
| B | 200 | 100 | 100 | 100 |
| C | 200 | 20 | 100 | 300 |
| D | 200 | 200 | 20 | 20 |
| E | 200 | 140 | 60 | 100 |
| F | 200 | 160 | 160 | 80 |

Rank the investment using net present value (NPV) using a discount rate of $10 \%$ and state your views.

Problem 5. After considering a survey that cost Rs. 300000 X Ltd., decided to undertake a project putting a new product in the market. The company's cut off rate is $12 \%$. It was estimated that the project would have a life of 5 years. The project would cost Rs $60,00,000$ in $\mathrm{p} \& \mathrm{M}$ in addition to working capital of Rs. $15,00,000$. The machine has no scrap value at the end of 5 years. After providing depreciation on straight line basis, profits after tax were estimated as follows:

| Year | Amount (Rs.) |
| :--- | :--- |
| 1 | 600000 |
| 2 | 1000000 |
| 3 | 2600000 |
| 4 | 1000000 |
| 5 | 800000 |

The present value factors @ $12 \%$ per annum are given below

| 1st year | 0.8729 |
| :--- | :--- |
| 2nd year | 0.7972 |
| 3rd year | 0.7118 |
| 4th year | 0.6355 |
| 5th year | 0.5674 |

Ascertain the net present value of the project.
