

RAMA UNIVERSITY

www.ramauniversity.ac.in

Program : B.Tech

Year/Semester: 7th

Subject : Computer Aided Design BME-701

Course Objective

To develop the ability to use of computer in design process using different methods tools software and recent trends

Course Outcome

After completion of this course the students are expected to be able to demonstrate following knowledge, skills and attitudes towards:

- To **knowledge** with computer input output devices related to CAD(Level 1).
- To develop **Comprehension** of computer graphics algorithms skills(Level 1).
- Having **knowledge** about the geometric curves and there uses in body design(Level 1).
- Application** of Finite Element Method to analyses the mechanical parts(Level 2).

UNITS

UNIT I

- Introduction & Computer Graphics I

UNIT II

- Computer Graphics II & Geometric Transformations

UNIT III

- Curves

UNIT IV

- 3D Graphics:

UNIT V

- Numerical Methods & FEM

Lecture No 1 Topic: Introduction

- Originally CAD includes any techniques that use computers in the design process including drafting, stress analysis and motion analysis.
- But over the last 35 years, CAD has come to refer more specifically to Computer Aided Design and Drafting.
- CAD program/software is an electronic tool that enables you to make quick and accurate drawings with the use of a computer.
