LECTURE 1: Ancestral and Separate Property

In turn, joint family property can be divided into two classes,namely-

- 1) ancestral property,and
- 2) separate property of coparceners thrown into common coparcenary stock.

Ancestral property is a species of coparcenary property. Ancestral property is acquired by unobstructed heritage.

Which property is ancestral property or separate property?

- 1) Property inherited from a paternal ancestor is ancestral property.
- 2) Property inherited from maternal grand father is not ancestral property,but it is his separate property.
- 3) Property inherited from collaterals or from females will be his separate property.
- 4) Share allotted on partition of ancestral property is ancestral property for his children. As regards other relatives, such a share is separate property.
- 5) Property obtained by gift or will from a paternal ancestor whether it will be ancestral property depends on facts of case.
