FACULTY OF COMMERCE & MANAGEMENT

INTERNATIONAL CONFERENCE

An International Seminar on E Commerce and Digitalization: Opportunities and Challenges was organized from 11th Feb, 2017

THE SIGNIFICANCE OF CONFERENCE

Digital transformation implies the adoption of digital tools and processes in your business to achieve strategic business goals. It is a multifaceted process that has the capability to bring a substantial cultural and organizational shift in the business. The eCommerce industry is not untouched by this digital tide.

Innovations in digital technology have helped in reducing the relevance of distance, whether geographical or linguistic. This has eased searching products, matching the preferences of consumers to products and verifying quality and reputation. It is because of this connection that the e-commerce stores have gained their importance in consumer's life.

For the unparalleled growth of the e-Commerce market, fast, secure, and effective payment options are essential. Studies say that about 69% of shopping carts are abandoned on an e-commerce platform by the customers. A tedious and complicated payment procedure is one of the reasons why it happens.

Hence, an e-commerce platform needs to have an efficient and easy payment procedure. The payment mode usually varies according to the region, like in Canada and the US market, credit cards are popular, but digital funds and debit cards rule the European market. Though the developing economies are largely cash-based, they are rapidly making their way towards digitalization.

The Seminar was graced with guest speakers from different fields. Dr. Matthais Keifer from UK, Dr. Subhash Mishra from IIT Kanpur, Dr. Md. Anees from Lucknow University, Dr. Milind Vora from Gujrat, Dr. Rakhi Gupta from BHU , discussed about the opportunities and challenges prevailing for the Indian economy in the long and short run.
