

Programs offered

1. Undergraduate
2. Postgraduate
3. Doctoral

S.No.	Course	UG/PG	Specialization	Duration
1	B.D.S.	UG		4 Years
2	M.D.S.	PG	Conservative dentistry and Endodontics	3 Years
3.	Ph.D.	-	Conservative dentistry and Endodontics	Minimum 3 Years

UNDER GRADUATE CURRICULUM

The department focuses in imparting training to the undergraduates in their second, third and final year BDS.

Various aspects of restorative dentistry are thought by our senior faculty to the students of second year. This includes the lectures and demonstrations in the preclinical lab with the typhodonts. The students are periodically assessed .

Students of Third year and Final year BDS manage all the restorative procedures with an insight to the endodontic procedures practiced in the department.

After a thorough monitoring of the restorative cases, Interns are trained to take up Anterior and posterior RCT's.

POST GRADUATE CURRICULUM

Every post graduate in the department is exclusively trained to handle an average of 5-6 cases each day which include simple to very challenging cases during their Course.

Apart from handling Root canal treatments post graduate students are trained to use all the Novel materials and Equipments like Lasers, operating microscope, ultrasonic, biomimetic materials, thus enhancing the holistic care of the patients

Students are encouraged to be active in research activities such as working with the new materials, participating in national and international workshops and conferences. All the PGs are encouraged to publish articles in various academic journals.

PhD CURRICULUM

All the research scholars enrolled in the department of conservative dentistry are exclusively monitored in selection and completion of their research proposal.

The research scholars are guided in different aspects, preparation for the pre PhD Course work.

They are encouraged to utilize the facilities in the central research lab which enhances the Molecular research work.
