

Projects

- **Internship Program** – Final year students of Bsc Nursing program and GNM program have to undertake internship for a period of six months for their course completion in Rama hospital And Research centre. Internship provides a platform to students to enhance and practice their theoretical knowledge as well as practical skills and experience gained during their course duration.
- **Final Research Project** – PG Students are encouraged to undertake clinical oriented research projects. This helps students in understanding and developing the conceptual framework for data analysis and conclude the innovative findings.
- **Small Projects**- BSC nursing, PBBSC Nursing students are assigned with research projects during their course. The students conduct these studies as a group project to explore the research methodology concepts in detail.
- **Assignments & Presentations** – Students are allotted individual assignments in each subject area according to curriculum requirements and clinical presentations are mandatory for them.
- **Simulation Exercises & Case Studies** – Clinical case studies make the theoretical learning into a completion mode. All the students are undertaking individual case studies during their clinical hours. Health talks and role plays provide an extraordinary platform for students to enhance their knowledge and build a bond with the clients.

Research Project – M.Sc (N) – II year (2018-19)
